

SAFE OPTION SOLUTIONS

Safe Option Solutions are proud distributors of the BLH Stop Drop™ Safety Barricading Systems, that reduce injuries and are independently tested and certified. BLH Stop Drop™ Safety Barricading System is an advanced plastic polymer barricading system designed to combat one of the world's most common causes of workplace injuries and fatalities, being hit by a falling object. With unique features including its adaptability across a variety of industries the system is lightweight, reusable and reliable, no sharp edges and is maintenance free, making this product an attractive choice over its steel competitors.

Here are a few more key features;

- Suitable for both permanent and temporary installations, as well as scaffolding and conveyors
- Innovative snap lock and clip on design
- Corrosion resistant
- Chemical rated
- Adaptable to a variety of industries
- Lightweight

- Reusable and recyclable
- No risk of injury/infection from sharp edges
- No hot work required
- Maintenance free
- Fire rated
- Available in safety yellow, but can be supplied in a variety of other colours on request.

BLH Stop Drop™ Barricading is certified for securing to work platforms, railings, stairs and under-stairs, scaffolding, conveyors and more. The system can be used in most industries and mounts directly onto existing structures.

MiOCS™ Machinery inspection Operating Control System is an electronic, stand-alone access control system that is specifically designed to control the pre-starting and use of machinery by personnel that are unauthorised or untrained. The system was developed to provide industry with a control solution for their machinery and ensures that the company's pre-start requirements are adhered to. The machinery can then only be used by personnel who are entered into the database

and logs all users in real date/time and can provide event reports. It acts as an invaluable tool in offering higher levels of engineering controls and meeting Workplace Health and Safety responsibilities.

Safe Option Solutions is located at Unit 5/40 Ingham Road, Townsville, and can cater to all your site safety requirements.
