Ponytail

Designed to give maximum protection from sun and wind the patented Frillneck hat is for anyone active outdoors. By combining the touch tape patches located around the hat many style variations are possible. To cover the face remember to engage the patch located above the ear (or on the original model engage the side loop to the patch on the headband) then bring the flap across the face. The headband is fully adjustable and has an elastic loop attached so you can 'ponytail' the flaps. To easily adjust the headband take off the hat. Most models also have a convenient zip pocket on the back.

IMPORTANT : When driving or operating machinery ensure that the flaps are out of harms way.

## COTTON DRILL SPF 50 +

A tougher fabric option. Durable and hard wearing it will soften over time increasing comfort. Good for the hard worker.
