BTECH

VERTICAL - LADDER CLIMBING LIFELINE SYSTEM

Complies to AS/NZS 1891.2

Features

- Hands-free movement up and down a ladder
- Easy to install components, no swagging required on site
- Low load transmission in the end point due to integrated shock absorber
- All ladder hardware components manufactured in AISI Stainless Steel Grade 316
- Can be attached to side or centre of a ladder
- Detachable Shuttle that allows for removal from system preventing unauthorised access

NATA World Recognised Accredited TESTING FACILITY

BTS is a company with AS/NZS ISO 9001:2000 Quality Assurance accreditation and NATA Registered Laboratory, our commitment to supply a quality product and service is of the utmost importance to us. Our NATA Test Laboratory located in Sydney.

- On-Site inspections available
- Tensile testing (Rated capacity W.L.L. proof load and testing facility for up to 500 tonnes)
- W.L.L. testing of lifting appliances
- Re-testing of repaired products
- Magnetic non destructive testing using M.C.C. crack control inspections
- We test all size chains and fittings, wire rope, synthetic slings, shackles, turnbuckles and associated equipment
- Fast turnarounds with competitive rates
- Issuing of certificates
- Computerised test certificates showing test results in graph form
- All work carried out in accordance with relevant Australian Standards
